

FIRST Tech Challenge Team 519 - Epsilon Delta Too

700 Bennett Street
Herndon, VA 20170
Telephone: (703)810-2200

2018 - 2019

Herndon High School's Robotics Team 519 is seeking sponsorships in order to fundraise parts and money to attend tournaments. Our team is proud to be affiliated with FIRST (For Inspiration and Recognition of Science and Technology) an international non-profit organization and the FIRST Tech Challenge (FTC) program. The mission of FIRST (www.usfirst.org) is to inspire young people to become science and technology leaders by engaging them in exciting mentor-based programs that build science, engineering and technology skills that inspire innovation; and to foster well-rounded life skills including self-confidence, communication and leadership.

The FIRST Tech Challenge exposes thousands of middle and high school students to engineering and technology in an exhilarating real world environment. By teaming up with experienced engineers from business, universities and government agencies such as NASA, students learn practical engineering and technical concepts. The team brainstorms, designs, constructs, programs and tests an operational robot uniquely designed each year for a newly revealed series of problems to solve. Our build season starts in September and completion starts in December. In addition, the team participates in outreach activities, bringing our robots to community groups and local elementary and middle schools to inspire young students and their families.

Our team has made tremendous achievements so far this season. To start out, we went to the [FIRST Tech Challenge Orange Qualifier](#) at Orange County High School for our first tournament. We went through the competition matches, doing well as we climbed through the ranks. We received many nominations for awards, ultimately winning the Motivate Award. Resulting from that event, we competed at the [FIRST Tech Challenge Battlefield Haymarket Qualifier](#) at Battlefield High School, making it to the finals after being ranked first at the end of qualifications. In the finals, we led our alliance to victory, winning it all on the competition field. At that qualifier, we were given the First Place Inspire Award, which displays all-around achievement, so we are advancing to the US Virginia FIRST States Tournament. We also competed at the [FTC Centreville Qualifier](#), where we did well both on and off of the field, making our way into the finals once again. We are looking to make improvements to our robot and add you as a sponsor, and so we ask for any help you would be willing to offer.

Please consider donating as well as sponsoring our team for this season and our upcoming seasons. It is a great way to get positive name recognition and encourage the development of future engineers, scientists and technology experts in the local community. Thank you for considering this request. If you have any questions, please contact us at hhsftcteam519@gmail.com

Sincerely,
FTC Team 519

Sponsorship Levels 2018-2019:

Honorary Member (\$10- \$49)

- The sponsor will be sent a thank you letter.

Honorary Member (\$50- \$99)

- The sponsor will be sent a thank you letter at the end of the season.
- The sponsor's name/logo will be listed on the team's website.

Silver Sponsor (\$100-\$499)

- The sponsor will be sent a thank you letter and a gift at the end of the season.
- The sponsor's name/logo will be listed on team banners and the team's website.

Gold Sponsor (\$500- \$999)

- The sponsor will be sent a thank you letter and a gift at the end of the season.
- The sponsor's name/logo will be listed on team banners and the team's website.
- The sponsor's name/logo will be listed on the team's robot.

Platinum Sponsor (\$1000 +)

- The sponsor will be sent a thank you letter and a gift at the end of the season.
- The sponsor's name/logo will be listed on team banners and the team's website.
- The sponsor's name/logo will be listed on the team's robot.

For our sponsors we would like to offer some return on investment as well. The skills and personal traits developed through this program in individuals are those same skills employers are seeking. **Our team develops our members into workforce ready individuals for local employers.**

The FIRST Robotics regional events are a great place to advertise! Not only are they filled with professionals, they also attract a large audience of young engineers, technology oriented students and their families and supporters. **Your support of our team is sure to be recognized at these events.**

<p>Checks can be made payable to: Herndon High School. Please reference "Robotics Team 519" on the memo line.</p>
